

[Competence](#) [1]

EV's corporate competence spans from general economic development to business level development work. EV studies different sectors of the economy and society through surveys, focus group facilitation, analysis, field and desk research.

- Competitiveness and Economic Development - the competitiveness paradigm is becoming a new framework for thinking about economic development. EV is at the forefront of introducing and applying those concepts in Armenia.
- Strategy - EV's core competence includes designing strategies and policies at company, industry and national levels. The company level work is carried out by EV Consulting.
- Investments - EV possesses in-depth knowledge of foreign and local investment processes.
- Diaspora Networks - EV has allocated resources toward accumulating intelligent and sophisticated understanding of the Armenian Diaspora's potential.
- Values - EV explores the values and cultural foundations of our society.
